24 hours without compromise

In cooperation with the local scout organization we have organized a very active afternoon and evening where the children could participate on all kinds of funny competitions where good condition was also required. In the evening we finished the day with a camp-fire. One of the scouts played the flute and children sang songs and played games. The next day few children went to a tour with the scouts. They came back the next day exhausted but with a lot of nice experiences.

Halloween

At Halloween the center was very crowded. Few creative girls from the town helped us to create a special -scary atmosphere at the center by painting bloody faces and teeth, wearing strange clothes. The afternoon started with a small drawing competition where the children drew Halloween symbols than the children moved to the mirror room where they showed their dancing skills together with our break-dancers. In the evening the children together with the stuff finished the day with some cooking and eating.

Activities with Fernando

Our Spanish volunteer Fernando often does all kinds of activities with the children:

"Due to the popularity of the last workshops, I usually appear in the corner of the center with several materials and a lot of good feelings to make all kind of things. I really like this part of my volunteerism, the creativity"

Fernando
