

# VMCM Monthly Newsletter

## March 2007

It is said that March is the strangest month in the year, because you can never predict what the weather will be on the next day - a winter storm or summer a hot summer day. But in VMCM it doesn't matter what month or season it is, the forecast is always the same - good mood and fun.

**member cards** - In March we decided to initiate the member-card system again. Here in VMCM the kids and youngsters had their own cards at the beginning, but since that time many of them lost it, and of course in the last 3 years the members has changed too. A lot of kids have come to get a new card. And this is also a good way for us to know approximately how many individual people that visit the café.

## billiard competition

As every month in March we also had an attractive competition which brought us a lot of sports, tension and emotions.

This month we organized a billiard competition, with Morten and Tibor as the brains behind it. The competition had many participants so we had to play 2 against 2 to allow more to play. The "sweet price" s for the "the top 3" were also motivating the kids... ☺

## "Roundabout - table tennis"

We also had a small Table tennis competition where the players had to run around the table hitting the ball once. The last 2 players left in each round then plays a final. We divided them into 2 groups and the first 3 in each group to reach 5 wins first then went to the final group. The competition was very popular, and the kids are often asking when we will arrange another round of this form of table tennis.

## Assembling puzzle

To much happiness for Zsolti (a guy with down-syndrome)

we bought a puzzle to be assembled, because he loves them. Unfortunately 1 piece was missing, but Zsolti and his helpers were happy with the puzzle anyway...
