

VMCM Monthly Newsletter

April 2007

At the beginning of April we made a simply but nice Easter decoration. The girls from the children's house helped us a lot with it, as you see from the pictures...

According to Chinese calendar the New Year starts in the spring with the beginning of new circle in life. And somehow we could say that in VMCM the beginning of spring in April means also many new things for us:

We have a **new help** in VMCM!

Her name is Andi, and she is in VMCM when Judit and Tibor are having holiday. She loves the kids, speaks four languages, so the kids are really happy with her. She is helping them with the Internet, teaching them, how to use the computer, etc.

In July a **new volunteer** will come!

The National Agency approved our new project, so we will have a new volunteer.

Her name is **Hely**, and she is from Bulgaria, just like Nadia was. She is 26, and is happy to come to our centre.

By the way she is friend of **Nadia**, who visited us in April! Some of the children knew, that she will come, and were waiting for here, but for some it was a very big, and very pleasant surprise!

Our **break-dancers** are not new, but finally after some intermission they resurrected, and started to exercise again! So we had to make a time-table, because the small "mirror-room" is almost always occupied: if the small folk-dancers are not there, than the break-dancers are coming ☺ they needed a lot of trainings to become good enough, because they will represent VMCM at the Thermal-bath, where they will perform in front of audience. It is really good to see them so active and working on something. Erik and Peti are really good, trying to motivate the others.
