March 2010

Giant puzzle

There are two weeks ago, Akos is coming to VMCM with a surprise for Zsolti. He came with a puzzle of 3000 pieces. Since this day a lot of different people have taken their times to help to finish the puzzle. At the beginning, there was just Zsolti, but after few days, the majority of the people who come to VMCM has spent time working on it. Its interesting to see different people stopping by the puzzle helping to finalize the big task. We are really happy to have such a nice cooperation between the youngsters!

Kids from the Slovak School

Since Tibor is also English teacher at the Velky Meder Slovak School, he was visiting the youth centre with his class to introduce them to the volunteers to have some conversations and also to show them the different possibilities and activities in VMCM. It was very successful for our center, as a lot of them kept coming afterwards and are now members of VMCM.

Big EVS News

March brought happy news for the volunteering in VMCM, because there was a lot of progress in the search for the next European volunteers.

After Johan will leave in the end of June, Fernando from Spain will come to VMCM from 2nd of July. Everyone is very happy and looking forward to get to know Fernando. Another project was also sent, but is not proved yet. Hopefully in August another boy, Tim from Germany will get the chance to be a part of VMCM and spent his EVS with us. So everyone keep your fingers crossed J.

And VMCM also managed to send our second volunteer, his name is Krisztian and he will go to Hungary.

Easter decoration!!!

Finally in the end of march we started to decorate the windows in the center for upcoming Easter. A lot of kids joyfully participated in making some nice and colourful paintings.

All the best from the VMCM team J
